Leslie,

There has been allot of work going on to re-model the pit ore by grades, which incorporates the existing small pit. Currently we will be developing a new open pit and waste facility plan that will likely incorporate the existing pit area. Once complete in the next few weeks the team will make submittal to DOGM, with the necessary revised maps and plans. We believe the disturbance will be moved from what is currently permitted. We have not been mining since early January 09.

Lennie - What is the status of the consolidating the Large Mine and the 2 Small permits into the one Large mine permit? See attached letter sent Jan 22, 2009. I will be out in the basin soon and it would be great if the permit amendment is finalized. thx-lah
